

XML desktop publishing solutions

FLUID CMS Basic Features Gallery

Familiar editing screen

FLUID CMS has the OpenOffice.org Writer interface built right into it. This makes editing your Web content as easy as editing a Word document.

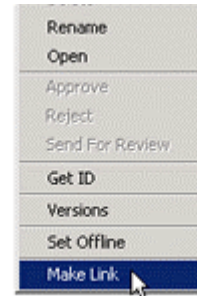

Automatic Navigation Bar

Organize your content into Folders. FLUID CMS generates a Web site that displays them as Navigation Bar items.

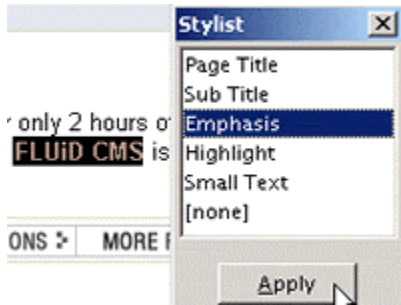

Automatic link management

All your internal links are maintained by FLUID CMS—eliminating dead links.

XML desktop publishing solutions

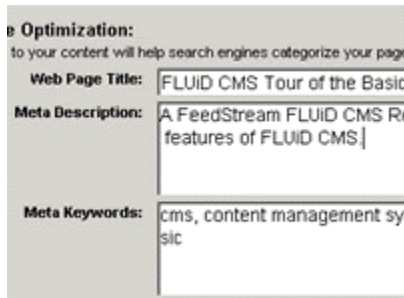

Controlled text styles

Create a handful of text font, colour, and size combinations and then use them throughout your Web site for consistent branding.

Wrap text around images

Fill the blank space around images by using the text wrap feature—adjusts automatically for different screen sizes.

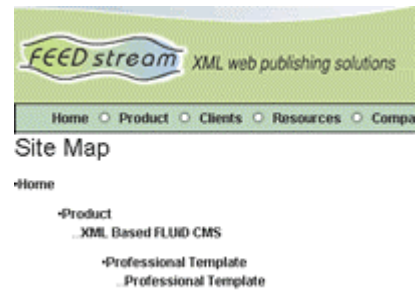

Keyword, Description control

For Search Engine Optimization, users can control Web page Title, Keywords, and Descriptions for each page.

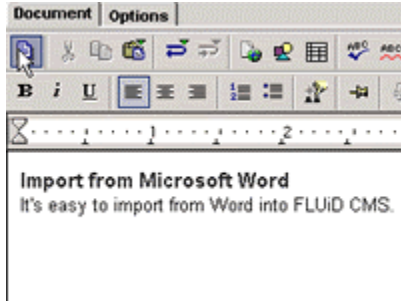

Automatic Site Map

FLUID CMS offers the option of automatically generating a Site Map and creating a Navigation Bar link to it.

XML desktop publishing solutions
