FLUID CMS 4.5 Quickstart

Launch FLUID CMS from the Desktop icon , and login to your site. In the Folder Pane, navigate to the Folder that contains the Content File you wish to edit. **Open** the Content File from the Content tab of the File Pane, so that its contents appear in the Editing Pane.

Viewing Your Site in the Browser: When you have made a change to the content of your site in FLUID CMS, click the **Save** button  then the **Publish** button . Then go the Main Menu of the FLUID CMS Workspace and choose **Tools>Launch Site**. When the browser opens to the Homepage of your site, click **Refresh** to see the changes.

Adding Text and Images: You can add new text or modify existing text within the Editing Pane as you would in a typical word processor. To add an image place the cursor where you would like the image inserted. Then, from the menu above the Editing Pane in FLUID CMS, click on the **Insert Image** button  and browse to the desired image.

Adding a New Content File: Go to the Folder Pane and click on the Folder in which you would like to create a new Content File. Select the Content tab, then rightclick in the File Pane and from the drop-down menu choose **New File**. You will have the option of naming the new Content File when you **Save** it or **Close** it.

Adding a New Folder: Go to the Folder Pane and rightclick on the Folder in which you would like to create a new Folder. Choose **New Folder** from the drop-down menu. The new Folder will appear as a menu item on the Left Navigation Box of your Web site.

Making an Internal Link: In an open Content File, highlight some text or an image where you would like make a hyperlink. With the selected item still highlighted, browse in the Folder Pane so that the Content File you want to link to is shown in the File Pane. Rightclick on that Content File, and from the drop-down menu choose **Make Link**. To remove a hyperlink rightclick on it and select **Default** from the drop-down menu.

Linking to an External Web Address: In an open Content File, highlight some text or an image where you would like to make a hyperlink. Rightclick on the selected item, the click the **Hyperlink** button , and enter the target Web address.

Changing the Logo Header: **Open** the Design File that is in the Folder you want to modify and choose the **Web Header** tab **Web Header** at the top of the Editing Pane. **Delete** the existing image, then replace it by clicking the Insert Image button and choosing a new one.
